

GOOD GLIDING CHARTER

In order to fully participate in the development of our outdoor sporting activity, and to maximise the importance of intelligent and safe gliding, I hereby agree :

- ✓ To follow courses, and to have flown recently
- ✓ to be present at daily briefings in order to be aware of the weather conditions and security instructions;
- ✓ never to take off without all the required aeronautical and gliding documentation on board, this including all recent updates;
- ✓ only ever to fly in a good moral and physical condition (and I always take a break after several days consecutive gliding),
- ✓ to stick orange fluorescent strips on the wing tips and nose of my glider (A FLARM IS OBLIGATORY);
- ✓ to respect air space rules and regulations;
- ✓ to remain vigilant, and be aware of the position and trajectory of gliders around me, and to avoid collisions;
- ✓ to prioritise safety over performance, never creating conflicting trajectories (on entering thermals, respecting sufficient distance between gliders, respect of priority in ridge gliding, landing circuits...);
- ✓ never to overstep my gliding capacities and not allow myself to venture into the unknown;
- ✓ announce my position and my intentions regularly over the radio;
- ✓ not to underestimate the difficulties that might occur in certain zones (Briançonnais, Queyras, Haut-Verdon);
- ✓ always to allow time for visualization and preparation of a landing circuit.

I hereby confirm that I have followed the briefing, and agree to apply good gliding rules.
